

MULTI-SITE BUSINESSES

All your sites, one page.

Across many sites, one picture of visits, mood and queues.

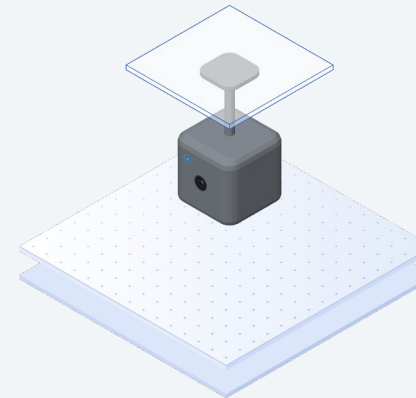

WHAT THIS IS

Pulses.ai is a UAE-born Physical Intelligence company: AI that understands your physical world.

For multi-site businesses: each site reports its own way.

The Operating System for the Physical World

HOW IT WORKS

SEE

Pulses Vision on each site's ceiling

UNDERSTAND

Visits, mood and queues, understood

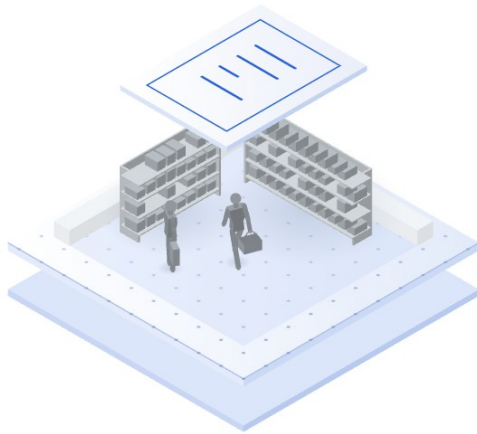

ACT

Sites compared; alerts reach your team

THE PROBLEM

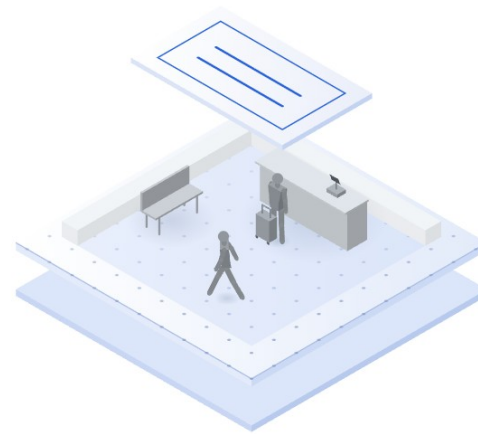

Each site, its own report.

Reports arrive late, each in its own shape.

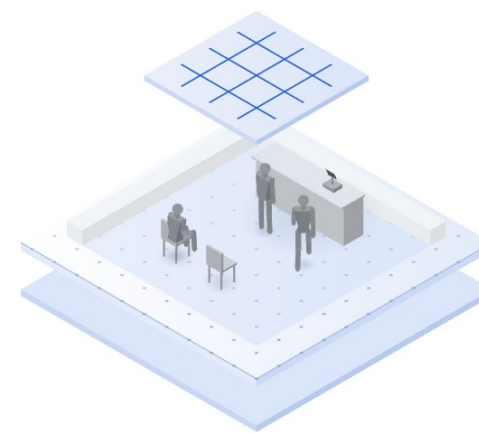

The report that arrives late.

The regional view is built from reports that arrive days late.

The same person, counted twice.

A door counter counts someone again at each pass.

A question means a phone call.

How long is the queue? Someone has to call the site.

HOW IT WORKS

From each ceiling to one page.

01

On each site's ceiling

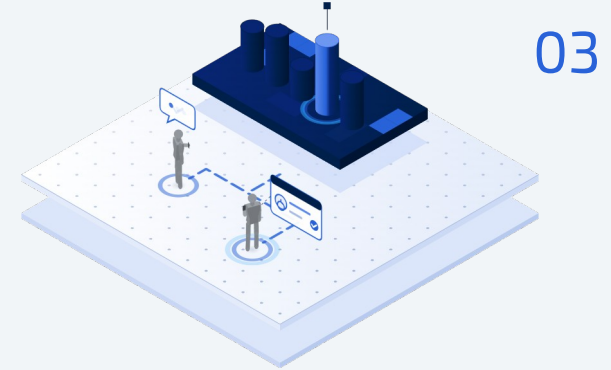

All processing happens on the device; only anonymous metadata leaves.

02

Visits, mood and queues

Visits counted once, mood read by zone, the queue right now.

03

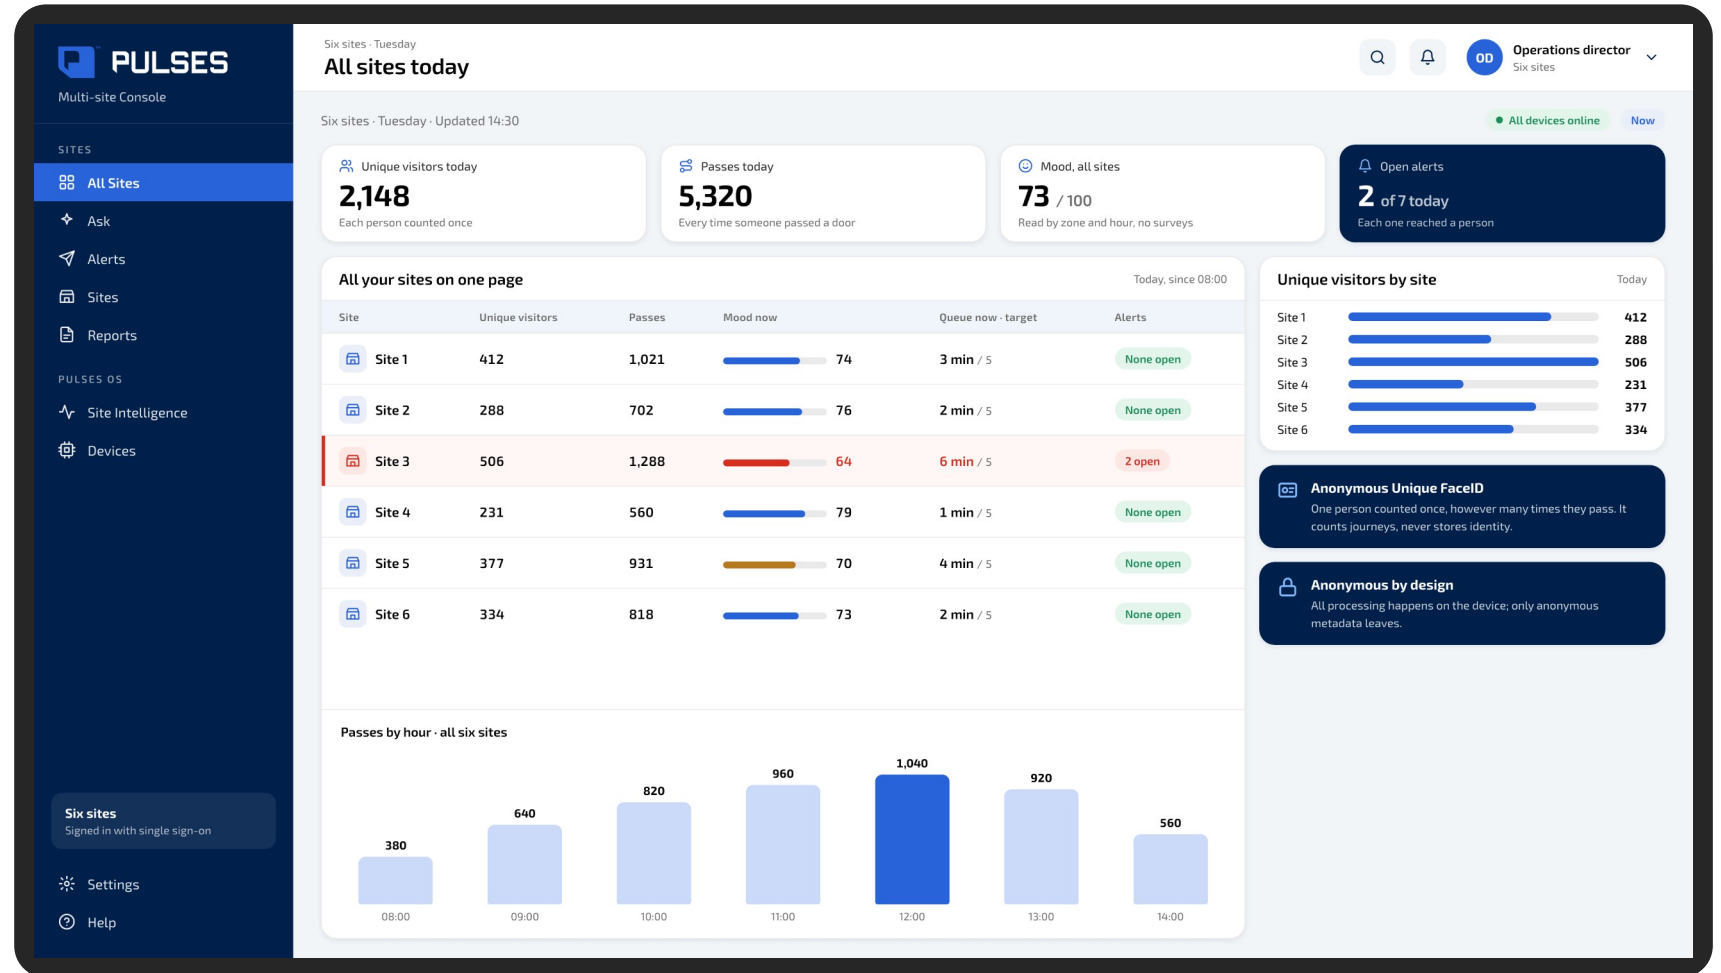

Compared, then alerted

All sites side by side; each alert reaches a person.

One page, side by side.

All your sites sit on one page, compared without a report.

Each person is counted once, however many times they pass.

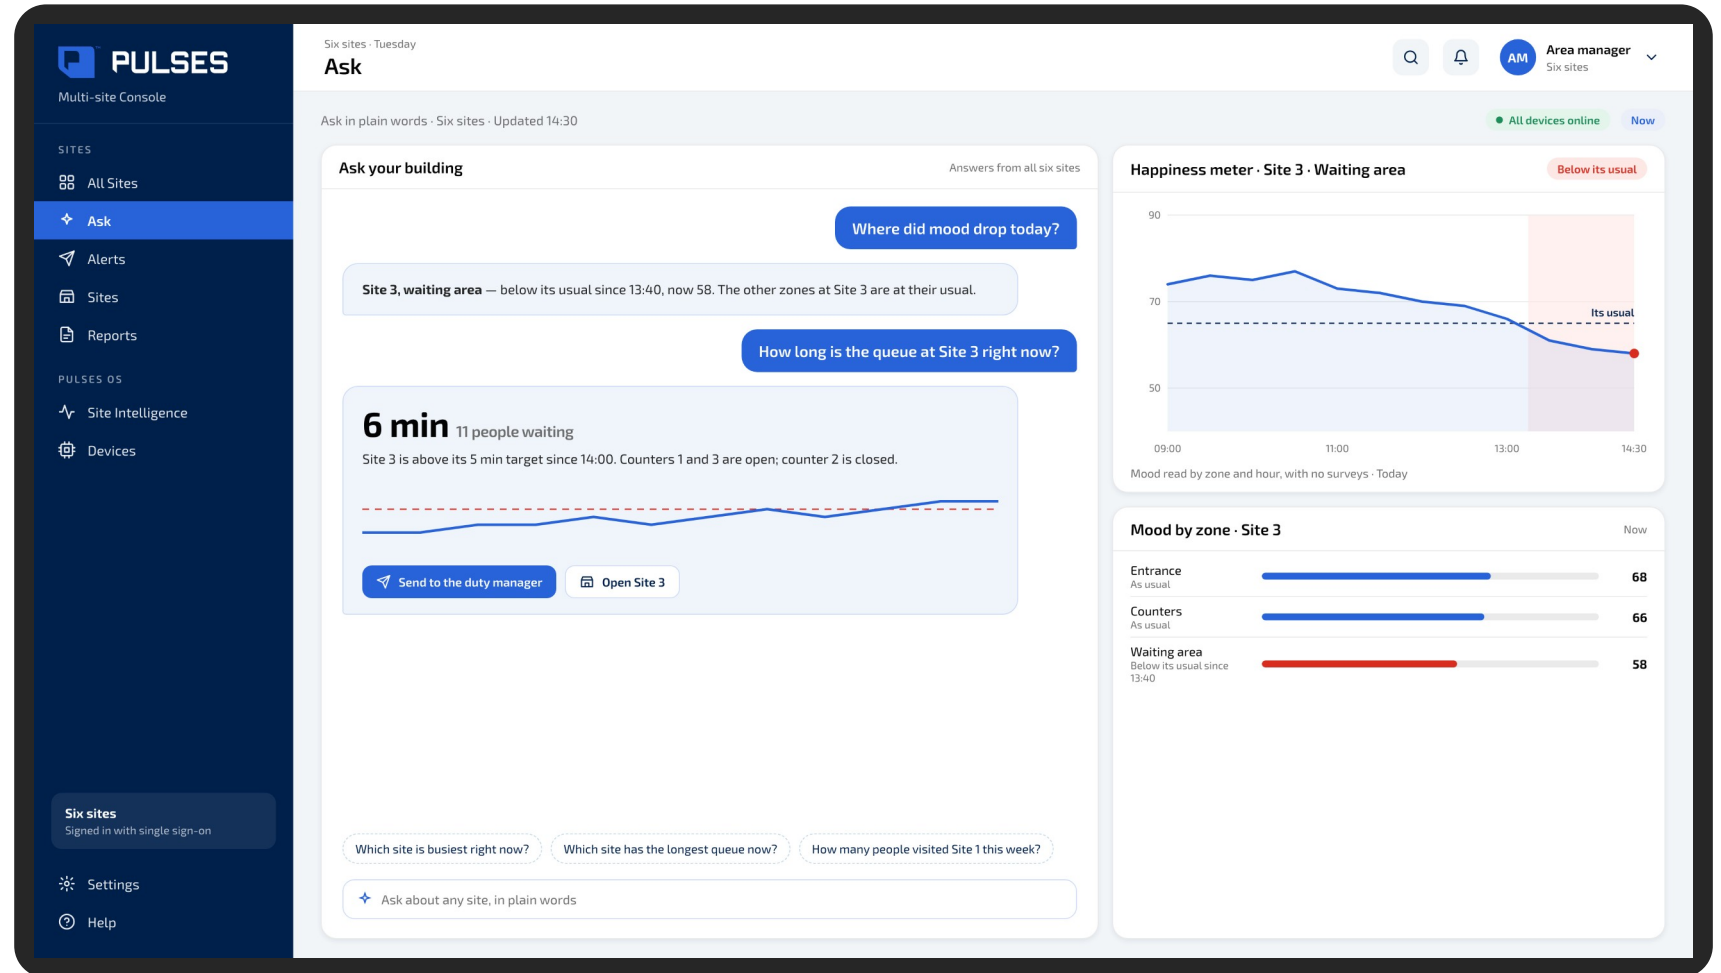

PULSES OS

Ask

Ask your building.

Ask in plain words: how long is the queue right now?

See mood by zone and hour, with no surveys.

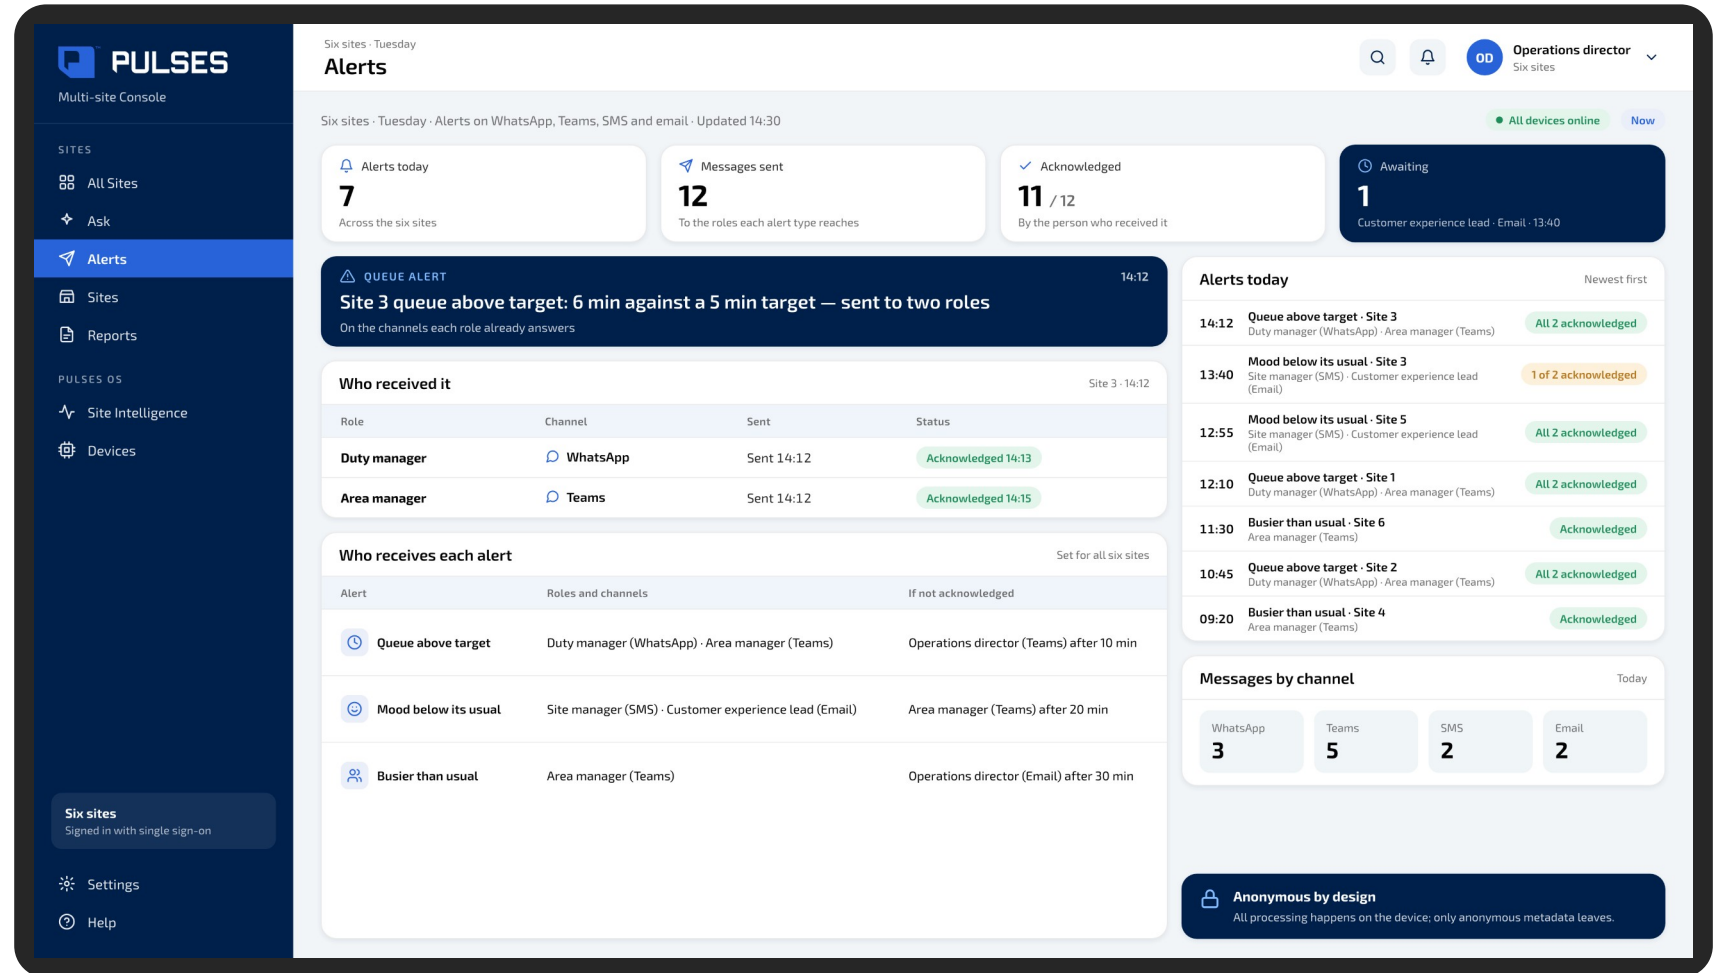

Alerts

Alerts that reach a person.

And alerts reach your team on WhatsApp, Teams, SMS or email.

- Which role received each alert
- The channel it went out on
- When it was acknowledged

Anonymous by design
All processing happens on the device; only anonymous metadata leaves.

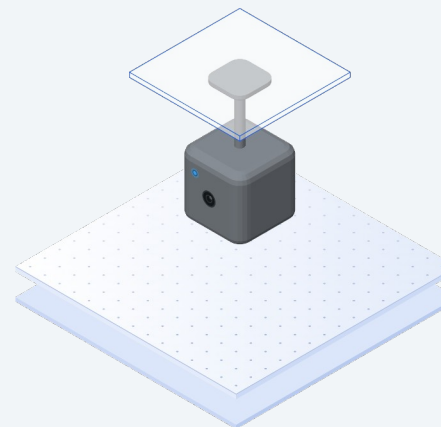

ANONYMOUS BY DESIGN

Counted once, kept anonymous.

Anonymous Unique FaceID

One person counted once, however many times they pass; it counts journeys, never stores identity.

On the device

All processing happens on the device; only anonymous metadata leaves.

PROOF

150 million+

journeys counted across Pulses deployments

Anonymous platform total
