

All your sites, one page.

Visits, mood and queues from
each site, compared on one page.

WHO PULSES IS, HOW IT WORKS

Pulses.ai is a UAE-born Physical Intelligence company: AI that understands your physical world.

For multi-site businesses: each site reports its own way.

SEE

Pulses Vision on
each site's ceiling

UNDERSTAND

Visits, mood and
queues, understood

ACT

Sites compared;
alerts reach your team

THE PROBLEM

Each site, its own report.

Read late, and hard to compare.

The report that comes late.

Each site counts its own
way, in its own format.

The same person, counted again.

A door counter counts
a person each time
they pass.

Mood, weeks later.

Surveys hear from a
few people, weeks after
the visit.

HOW IT WORKS

From each site to one page.

On each site's ceiling

A Pulses Vision device at each site.
All processing happens on the device;
only anonymous metadata leaves.

Visits and mood, understood

Each person is counted once, however
many times they pass.
See mood by zone and hour, with
no surveys.

Compared, and acted on

All your sites sit on one page,
compared without a report.
And alerts reach your team on
WhatsApp, Teams, SMS or email.

WHERE IT FITS

Shops, hotels, branches, buildings.

Retail chains

Stores compared without asking each one to report.

Hotel groups

Mood in the lobby, read by zone and hour.

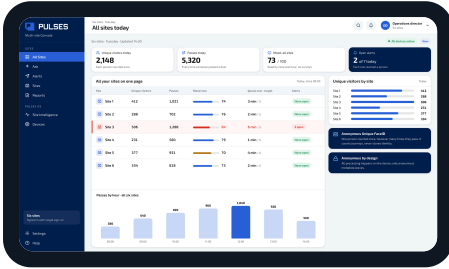

Branch networks

The queue at a branch, answered when you ask.

Building portfolios

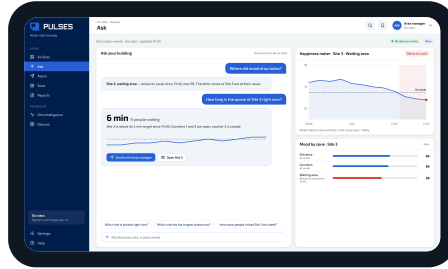

Visitors to each building, each person counted once.

THE PRODUCT ON SCREEN

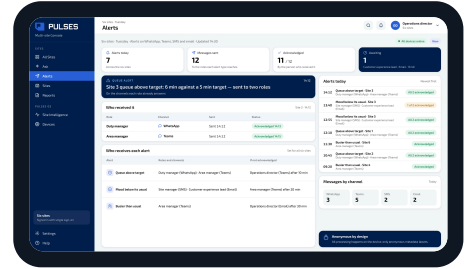

All sites today

Visitors, passes, mood, the queue and alerts, site by site.

Ask in plain words

Ask in plain words: how long is the queue right now?

Alerts that reach a person

Each alert, the role it reached, its channel and who acknowledged it.

COUNTED ONCE

Anonymous Unique FaceID: one person counted once, however many times they pass; it counts journeys, never stores identity.

PROOF

150 million+ journeys counted across Pules deployments

Anonymous platform total
