

Who's allowed in. Who's still inside.

The organiser's gate list, the restricted zones, and the headcount by hall.

WHO PULSES IS, WHAT THIS IS, HOW IT WORKS

Pulses.ai is a UAE-born Physical Intelligence company: AI that understands your physical world.

For venue teams: who's where stays unclear.

SEE

Pulses Vision above doors and zone gates

UNDERSTAND

Gate list, zones and exits, understood

ACT

Staff decide; wardens get the headcount

THE PROBLEM

Three questions, one event day.

Who may enter, who walked into a zone, who's still inside.

The gates fill.

Staff have seconds to act on the organiser's own list. Who walked through a side door goes unknown.

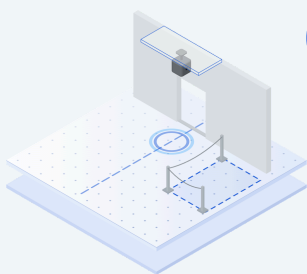

The halls empty.

When the alarm sounds, each warden asks how many are still inside their hall.

HOW IT WORKS

From each door to a person.

01

Above each door and zone gate

A Pulsed Vision device on the ceiling above each gate, each zone door and each hall exit.

02

The list, the zones, the exits

The organiser's own gate list, matched on the device. Each zone entry logged with its door and time. Door counts at every exit.

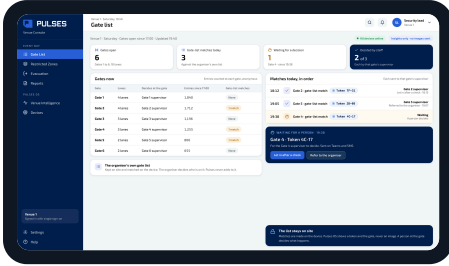

03

A person decides

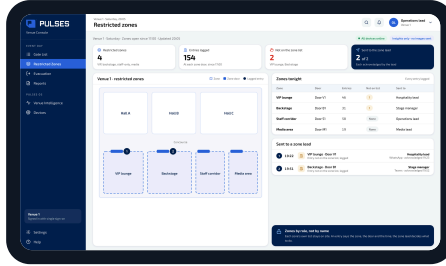

A gate-list match goes to the supervisor at that gate, who decides. Alerts land on WhatsApp, Teams, SMS or email.

THE PRODUCT ON SCREEN

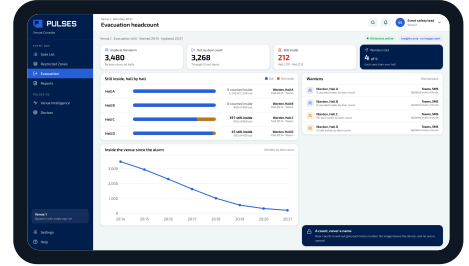

Your list. Your call.

The organiser's own list is matched on the device; staff at the gate decide. Pules OS shows a token and the gate, never an image.

Each zone entry, logged.

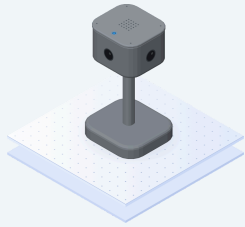

An entry into a restricted zone is logged, and staff are told. The VIP lounge, backstage, the staff corridor, the media area: each goes to its own lead.

Still inside, hall by hall.

In an evacuation, door counts tell wardens how many are still inside, hall by hall. Each warden sees their own hall.

BY DESIGN

For an event-length site.

Portable Vision Towers, set up at the gates for the event.

The list stays on site; the cloud never sees a name.

No image leaves the device.

All processing happens on the device; only anonymous metadata leaves.

A person decides.

The gate supervisor, the zone lead or the warden.

Where your team already is.

Alerts land on WhatsApp, Teams, SMS or email.

PROOF

150 million+ journeys counted across Pules deployments

Anonymous platform total
