

The site, when no one's there.

The fence line after dark, and the contractor visit nobody saw.

WHO PULSES IS, WHAT THIS IS, HOW IT WORKS

Pulses.ai is a UAE-born Physical Intelligence company: AI that understands your physical world.

For industrial sites: nights and visits go unseen.

SEE

Pulses Vision Pro
on the fence line

UNDERSTAND

Entries, unattended
objects and
visits, understood

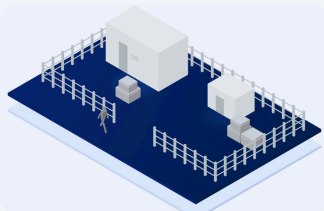

ACT

Alerts reach the
guard and manager

THE PROBLEM

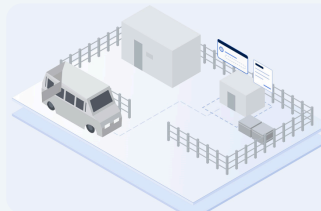

Nobody there, nothing known.

A site is most exposed when nobody is on it.

The fence line after dark.

Someone crosses the line, lingers, or leaves a bag by the gate.

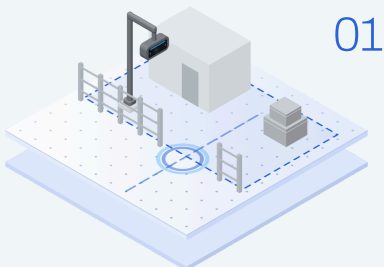

The visit nobody saw.

A service visit is booked and invoiced; whether anyone came goes unchecked.

HOW IT WORKS

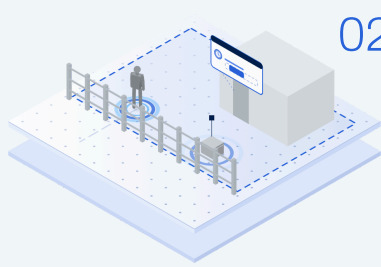

From the fence to the guard.

01

On the fence line

A Pulses Vision Pro on its pole, at the fence, the gates and the assets contractors service.

02

Entries, objects, visits

Entries after hours, objects left by the fence, lingering at it, and presence at a booked visit.

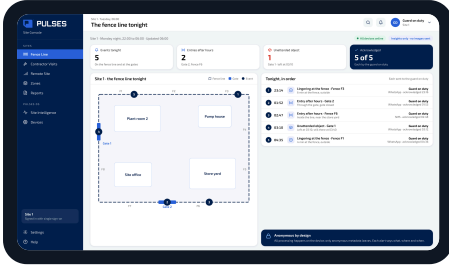

03

The guard and manager hear

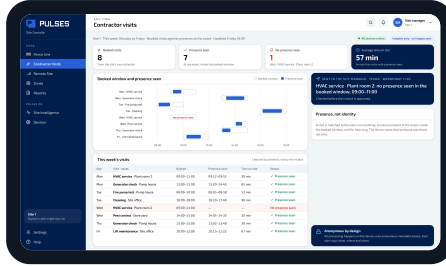

Alerts land on WhatsApp, Teams, SMS or email. The alert says what, where and when; no image leaves the device.

THE PRODUCT ON SCREEN

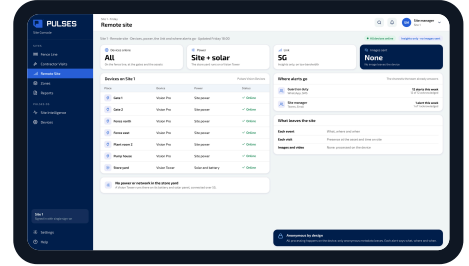

The fence line tonight

Someone inside the line after hours, and the guard hears. An object left by the fence is flagged too.

Contractor visits

A service visit is checked by presence, not by the invoice. No presence seen? The site manager knows before the invoice is approved.

Remote site

Every device, its power, its link and where alerts go. It runs on low bandwidth: no images leave the device.

WHERE THERE IS NO POWER

No power, no network.

No power on site? A Vision Tower runs on battery or solar. It connects over 5G, for open ground.

Privacy.

All processing happens on the device; only anonymous metadata leaves. Presence, never identity: the device reads that someone was there, not who.

PROOF

150 million+

journeys counted across Pulses deployments

Anonymous platform total
